Areas of Study

The Interdisciplinary Studies program gives you the opportunity to combine 2 or 3 unique areas of study to customize your major with multiple disciplines.

For each Area of Study, you can choose a general area of study or a specialized one. General areas of study have a list of course codes you can choose any course from. Specialized areas of study have specific classes you are required to take.

Please note: you may not apply more than 30 credits of one prefix to your areas of study.

1. You may not apply more than 30 credits of one prefix to your areas of study.
2. You may not select all of your areas of study from under the same general area of study. Thus, you may not select a general area of

study and a specialized area of study that falls under that general area of study. Likewise, you may not select multiple specialized areas of study that fall under the same general area of study with no third area of study from a completely different general area of study.
