Administration

Heidi DiFrancesca, B.S., Ph.D.

Dean, School of Health Sciences

Brendan C. Haynie, B.S., M.A., Ph.D.

Associate Dean, School of Health Sciences

Program Directors

A listing of program directors can be viewed on the Program Director webpage.

Research Intensive Courses

All research intensive courses are listed online on the Office of Sponsored Programs & Research webpage under Student Involvement.

Purpose

The purpose of the School of Health Sciences is to prepare professionals in the medical, health, and natural sciences through exceptional education, training, and research opportunities so that they may serve with excellence and impact the world through a Christian worldview.

Programs

- Biochemistry & Molecular Biology Major (B.S.)
- Biomedical Sciences Major (B.S.)
- Biopsychology Major (B.S.)
- Biotechnology Major (B.S.)
- Chemistry Major (B.S.)
- Conservation & Environmental Biology Major (B.S.)
- Environmental Health & Safety Major (B.S.)
- Exercise Science Major (B.S.)
- Forensic Science Major (B.S.)
- General Biology Major (B.S.)
- Health Sciences Certificate
- Health Sciences Major (B.S.)
- Medical Office Assistant Certificate
- Medical Office Assistant Major (A.A.S.)
- Physical Education & Health Major (B.S.)
- Public Health Major (B.S.)
- Respiratory Therapy Major (B.S.)
- Respiratory Therapy Major (RRT to BSRT)
- School of Health Sciences Minors
- Strength & Conditioning Major (B.S.)
- Zoo & Wildlife Biology Major (B.S.)
- Zoology Major (B.S.)

Allied Health Professions Department of Allied Health Professions Purpose

The Department of Allied Health Professions faculty members are committed to preparing undergraduate students in the following majors: Exercise Science, Health Sciences, Respiratory Therapy, and Physical Education and Health. Each major leads to a Bachelor of Science degree. Our objective is to encourage student growth in these disciplines from the Christian worldview in preparation for employment/graduate education as they pursue God's purpose for their lives.

Biology & Chemistry Department of Biology & Chemistry Purpose

The Department of Biology and Chemistry provides baccalaureate programs in general biology, biomedical sciences, biotechnology, chemistry, conservation and environmental biology, forensic science, biopsychology, zoo and wildlife biology, zoology, and biochemistry and molecular biology, and services courses in biology and chemistry for Resident and Online Programs. Our programs seek both to transmit and expand knowledge as well as to provide opportunities for research and service. The Department is a community of persons who are voluntarily linked in the pursuit of knowledge, providing a reasoned presentation of these academic disciplines in relation to the Christian faith. The Department's mission is to communicate academic content, Christian values, and requisite skills, all of which prepare persons for a lifetime process of learning and service.

Pre-Med Honor Society

The purpose of the Pre-Med Honor Society is to give recognition to students who have excelled in the biology and chemistry curricula or any other Liberty University major. Members of the Pre-Med honor society are exemplary for their high academic achievement, strong personal characteristics and their deep commitment to helping others.

Criteria for Membership

A student must have:

1. Maintained a GPA of at least 3.50 in any major field of study, and
2. A deep interest in becoming medical doctors.

Public & Community Health Department of Public & Community Health Purpose

The Department of Public and Community Health provides an integrated approach to health, offering competency-based and practice-focused preparation for successful careers in public health and healthcare. Through a Christian worldview, students will learn to strategically address the health needs of priority populations from the individual to the global level using a variety of health promotion and education strategies.

The department comprises both undergraduate and graduate degree programs applicable to a variety of practice settings and situations, as well as further education in the clinical and professional fields. Students

completing the program and meeting the prerequisites will be eligible for professional certification through the National Commission for Health Education Credentialing (CHES), and the National Board of Public Health Examiners (NBPHE) which offers the Certified in Public Health (CPH) certification.
